PROFESSIONAL SUMMARY

Open to work. Full-Stack Developer (Full-Stack Programmer) currently focused on developing ERP systems with ERPNext/Frappe and Odoo. Built a self-service SaaS platform on top of ERPNext that provisions a dedicated site per customer, with subscription plans, user limits, free trials and ZATCA e-invoicing (Phase 1 and 2). Also designed and developed a hospital management web system and a desktop POS, accounting and payroll system. Hands-on with data migration, deploying and maintaining Linux/Windows servers, networking and security, backed by accounting studies that help translate business processes into working systems. Building web projects since 2016.

EDUCATION AND CERTIFICATIONS

- Bachelor of Information Technology – Sana'a University (01/2020)
- Diploma in Accounting Systems; Accounting Diploma
- Technical Support Fundamentals – Google
- Fortinet NSE Certification Program (Levels 1–3)
- Computer Driving License Diploma; English Language Diploma; Alison Online Diploma (2020)

SKILLS

ERP development: ERPNext, Frappe Framework (custom apps), Odoo, ERP implementation and customization, ZATCA e-invoicing (Phase 1 and 2), data migration, accounting and payroll workflows, user training

Full-stack: Python, JavaScript, HTML, CSS, REST APIs, PHP, C#, Java, C++, React.js, jQuery/AJAX/JSON; responsive and RTL (Arabic) interfaces; MariaDB, MySQL, Microsoft SQL Server

Infrastructure: Linux and Windows server administration, networking, network security and firewalls, domains, DNS and SSL, email administration

Other: WordPress maintenance, AI integration, help desk support, hardware, security cameras and access control

WORK EXPERIENCE

IT Support Technician | 11/2023 – Present
PEX and Mtkmlh Co. – Industrial City, Riyadh, Saudi Arabia

ERP Systems Development (ERPNext & Odoo)

- Installed and customized ERPNext for various business needs (inventory, accounting, HR).
- Migrated existing data to the ERPNext system with zero downtime.
- Trained end-users and created documentation for ERPNext modules.

Server & Network Management

- Deployed and maintained local/cloud servers (Linux/Windows) for ERPNext and other services.
- Configured firewalls and implemented security protocols for server protection.
- Monitored server performance and resolved downtime issues proactively.

Web Development & Maintenance

- Performed website updates using HTML, CSS and JavaScript.
- Managed domain hosting, SSL certificates and DNS records.
- Implemented security patches for websites (WordPress plugins and core updates).

IT Software Support Technician | 08/2022 – 08/2023
Al-Ertikaz Almasi Company Ltd – King Abdul Aziz Branch Road, Al Wurud District

Corporate Domain Email Administration

- Created and managed professional email accounts using cPanel; configured MX records and DNS settings and verified domain ownership.
- Configured email encryption (SSL/TLS), spam filters and malware protection; set up forwarding and catch-all.
- Connected domain emails to various platforms (ERPNext, Zoho Mail, Google Workspace).
- Troubleshot email delivery issues (blacklisting, bounce-backs), monitored logs, managed quotas, backups and archiving, and supported email clients (Outlook, mobile).

Smart Security Systems Installation & Integration

- Installed and configured smart cameras (IP/analog), access control (fingerprint/RFID) and attendance systems.
- Set up NVRs with remote monitoring via mobile apps; implemented file sharing and centralized storage; monitored employee devices through network management tools.

Programmer | 01/2019 – 10/2021

Smart Networking – Sana'a, Yemen

- Coded websites using HTML, CSS, JavaScript and jQuery.
- Planned website development, converting mockups into working sites with HTML, JavaScript, AJAX and JSON.
- Integrated third-party APIs to extend application functionality.
- Implemented responsive web design and optimized website performance, following SEO best practices.

PROJECTS

ERPNext self-service SaaS platform | aqarsmart.com

- Customers sign up through a public form, pick a plan and receive a dedicated ERPNext site on its own subdomain, with modules switched on per plan and no manual work on my side.
- Automated trial period, monthly/yearly subscriptions, user limits and subscription suspension when payment stops; ZATCA e-invoicing (Phase 1 and 2); a mobile invoicing app connected to the system.
- Built as Frappe apps: *saas_billing* (subscription and site management), *saas_client* (suspension gateway and customer interface) and *accounting_shortcuts* (bilingual accounting dashboard).

H*A System: Desktop POS, Accounting and Payroll | 12/2021 – Present

- Arabic Windows desktop application (Visual Studio) for small retail: sales screen with categories, cash and credit sales, invoice printing, holding and resuming invoices, purchases, cash withdrawals, employee payroll, expenses and reports.

Hospital Management System | 08/2021 – Present

- Arabic RTL web application built from scratch with role-based portals (admin, doctors, patients, nurses, pharmacists, lab, accountants, reception): appointments, prescriptions, lab reports, pharmacy, billing, HR and a live dashboard.

Web templates, apps and games (HTML, CSS, JavaScript) | Public portfolio

- Multi-page Arabic/English websites (company, clinic, law firm, real estate, restaurant, online store, portfolio), a hospital web demo, a POS interface, 8 web apps and 13 games, all published online.
